Dr. Erich Bloch  
Director, National Science Foundation  
1800 G Street, N.W.  
Washington, D.C. 20550

Dear Sir:

The Central Intelligence Agency will conduct in mid-September a two-week Seminar on Rapidly Advancing Technologies. We would like you to be the keynote speaker for the Seminar.

The Seminar is designed to train a select group of Agency analysts on those emerging technologies that affect a country's industrial leadership and/or strategic weapon systems capability. Topics to be covered in the Seminar include: fiber optics, materials, computers, microelectronics, communication, and biotechnology. The Seminar combines guest speakers with field trips to R&D facilities and will include a visit to SEMICON-East in Boston.

The Seminar will begin on Thursday, 12 September. The briefings will be in the Agency's Office of Training and Education Building in Arlington, Virginia. We would appreciate your addressing the group on the 12th, or 13th of September.
